

Theme

SHODH is an expedition and result of combined efforts of some scholars to throw light on rare, relevant and scholarly research work. Our goal is to fulfill the need of researchers and inculcate new and relevant trends in research work. In lack of recourses and opportunity to publish the thesis, major research works are dumped in university libraries. There is lack of coordination in research works of various universities and research institutes too. Due to this, large extent of duplicasy in research works is found. So, we are trying to construct and maintain data-base of researches in Humanities and Social Sciences, to give platform for qualitative researches and to reinforce interdisciplinary research.
